Investigation of circle shape around scattering vertices

primary vertex with 1 outgoing particle

3/12

x and y position of primary vertex

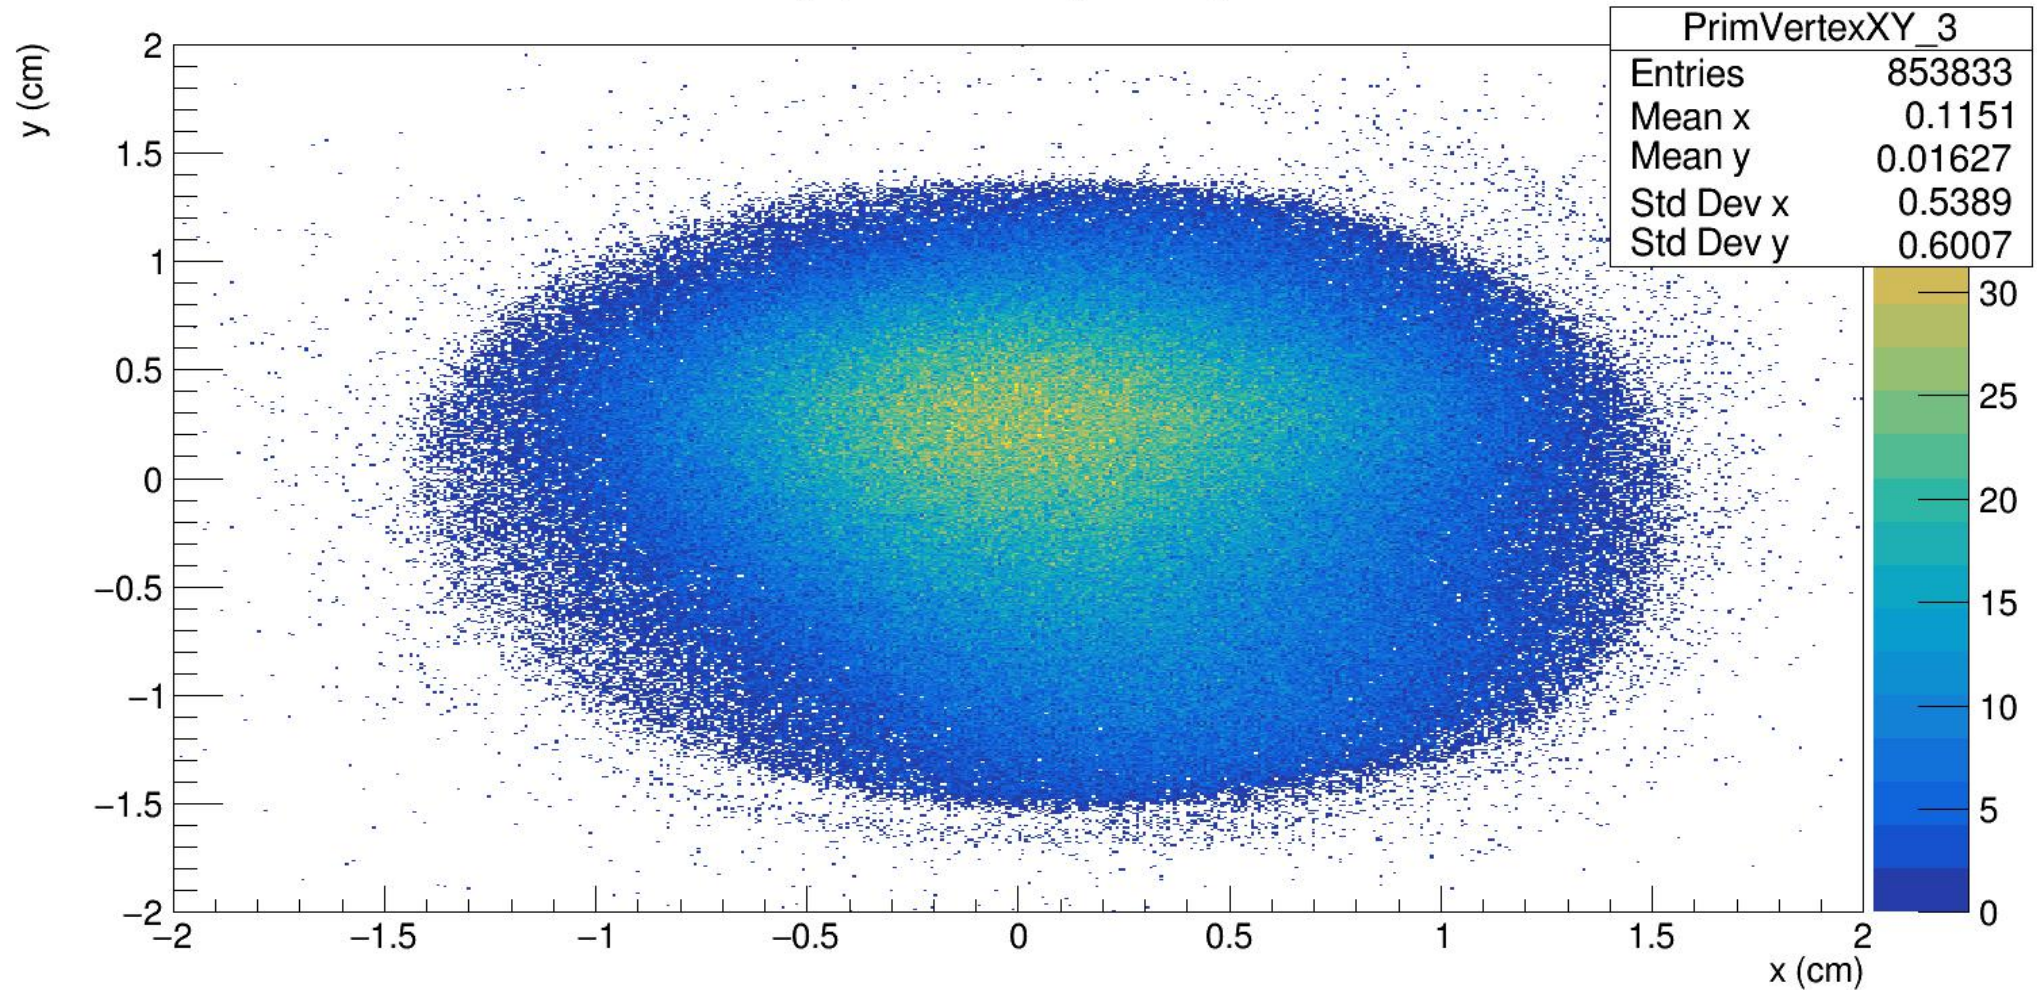

event number: 70069

primary vertex with 3 outgoing particle

4/12

x and y position of primary vertex

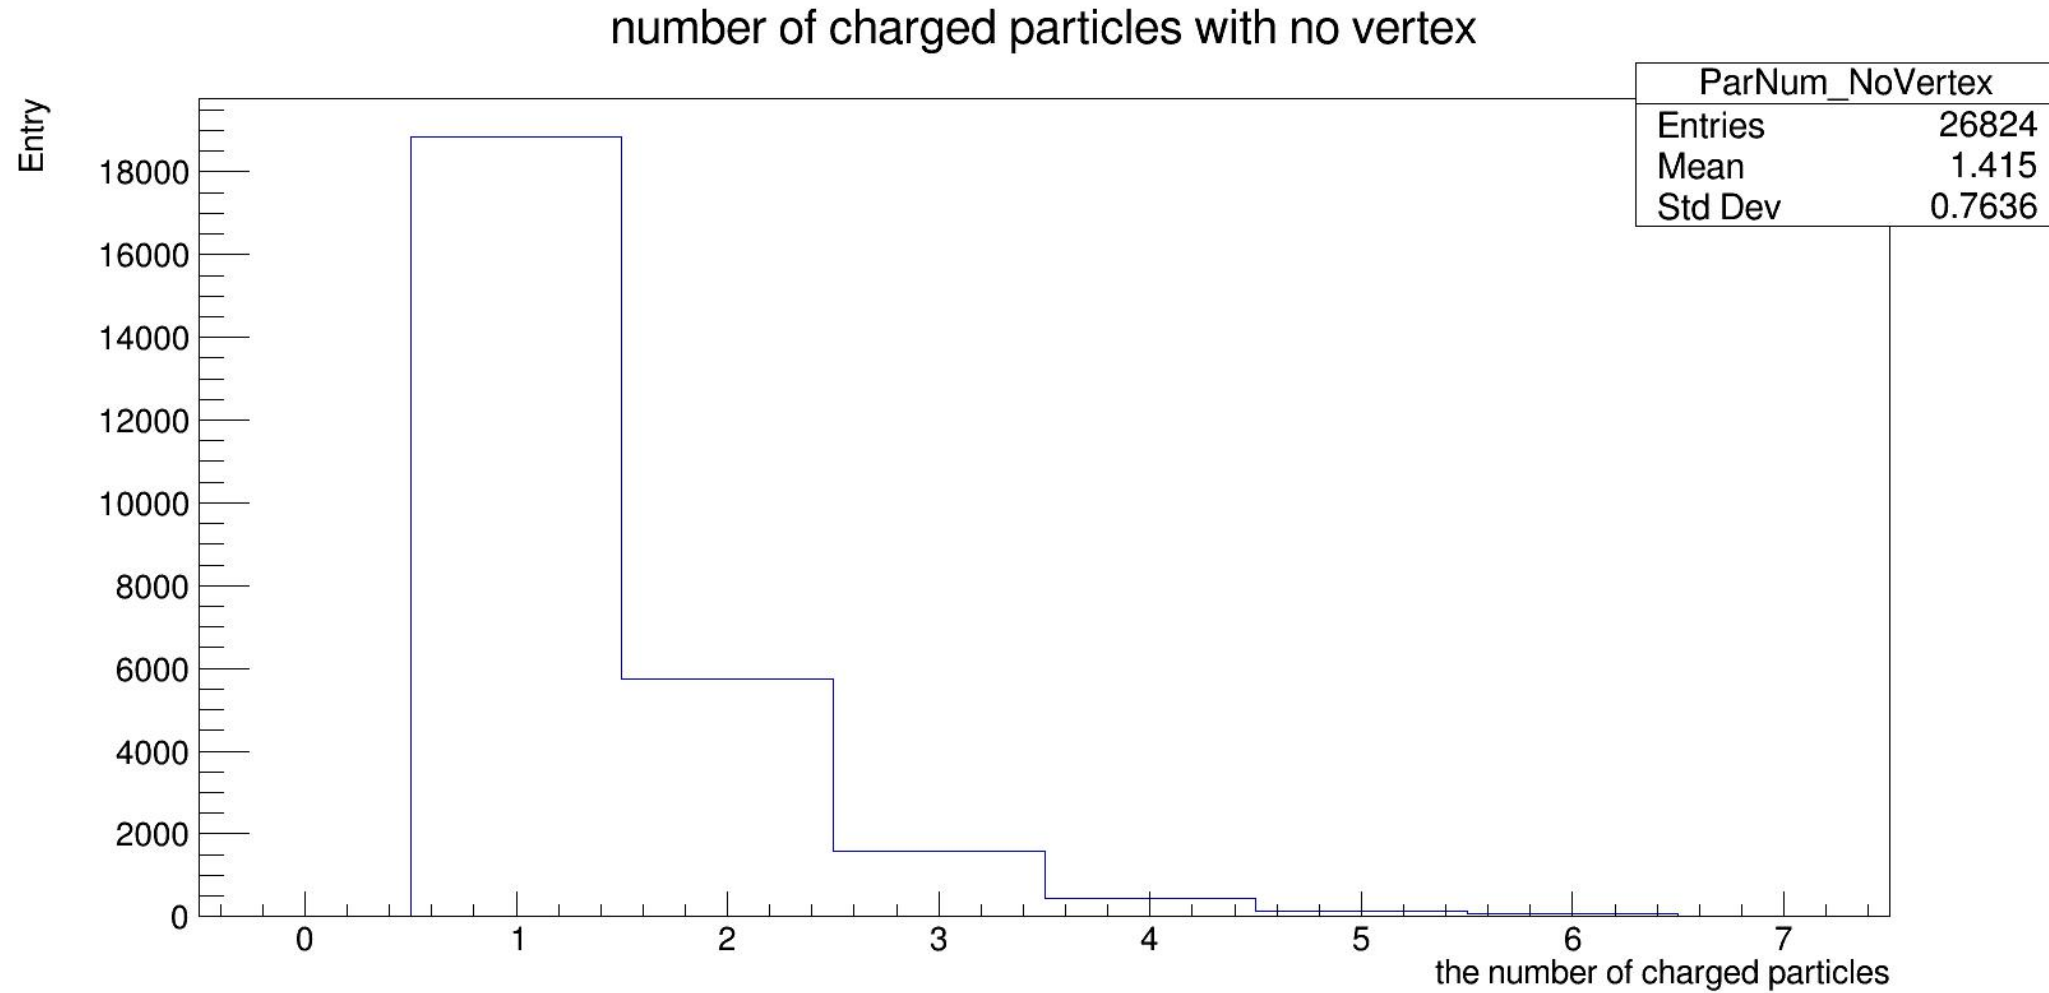

event number: 70069

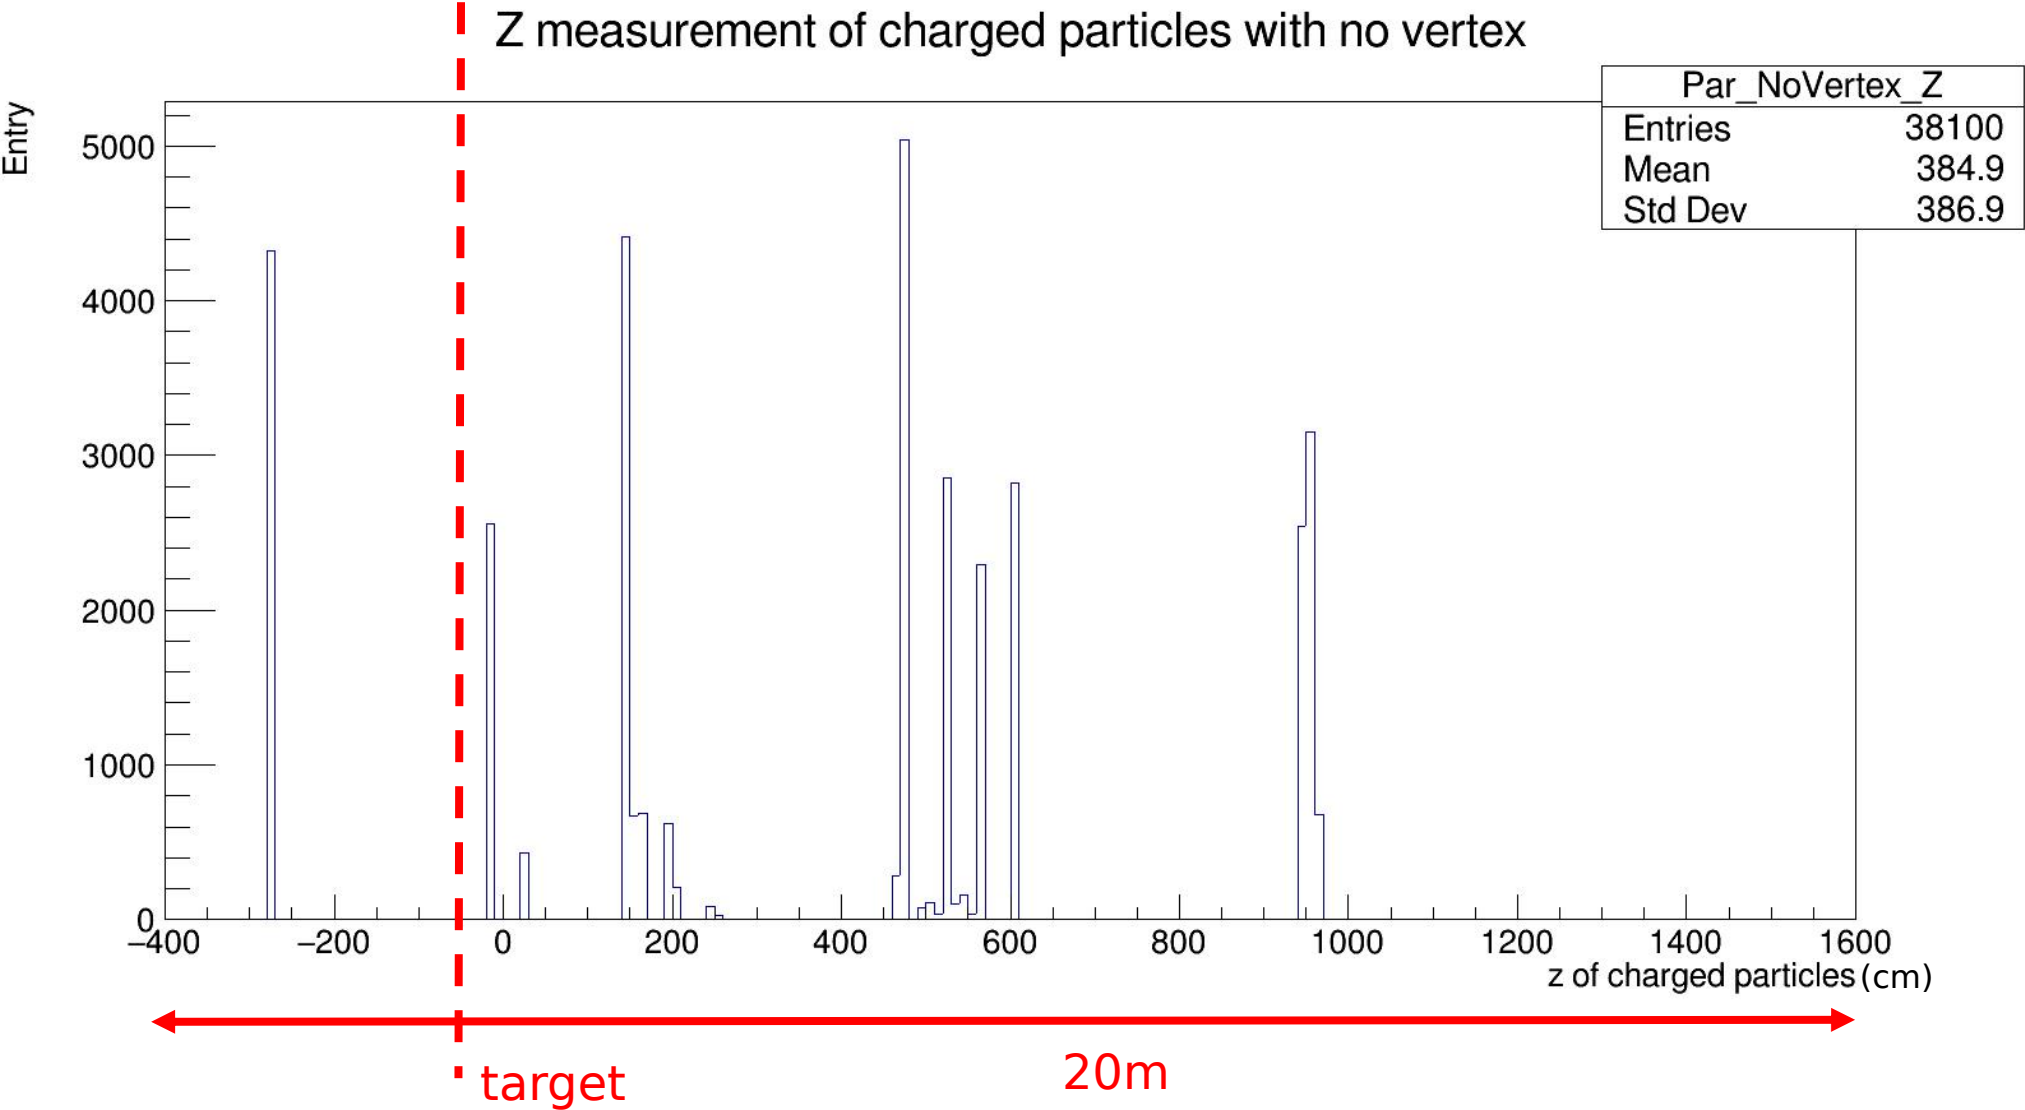

Charged particles with no
vertex connected

Charged particles with no vertex for one Run

6/12

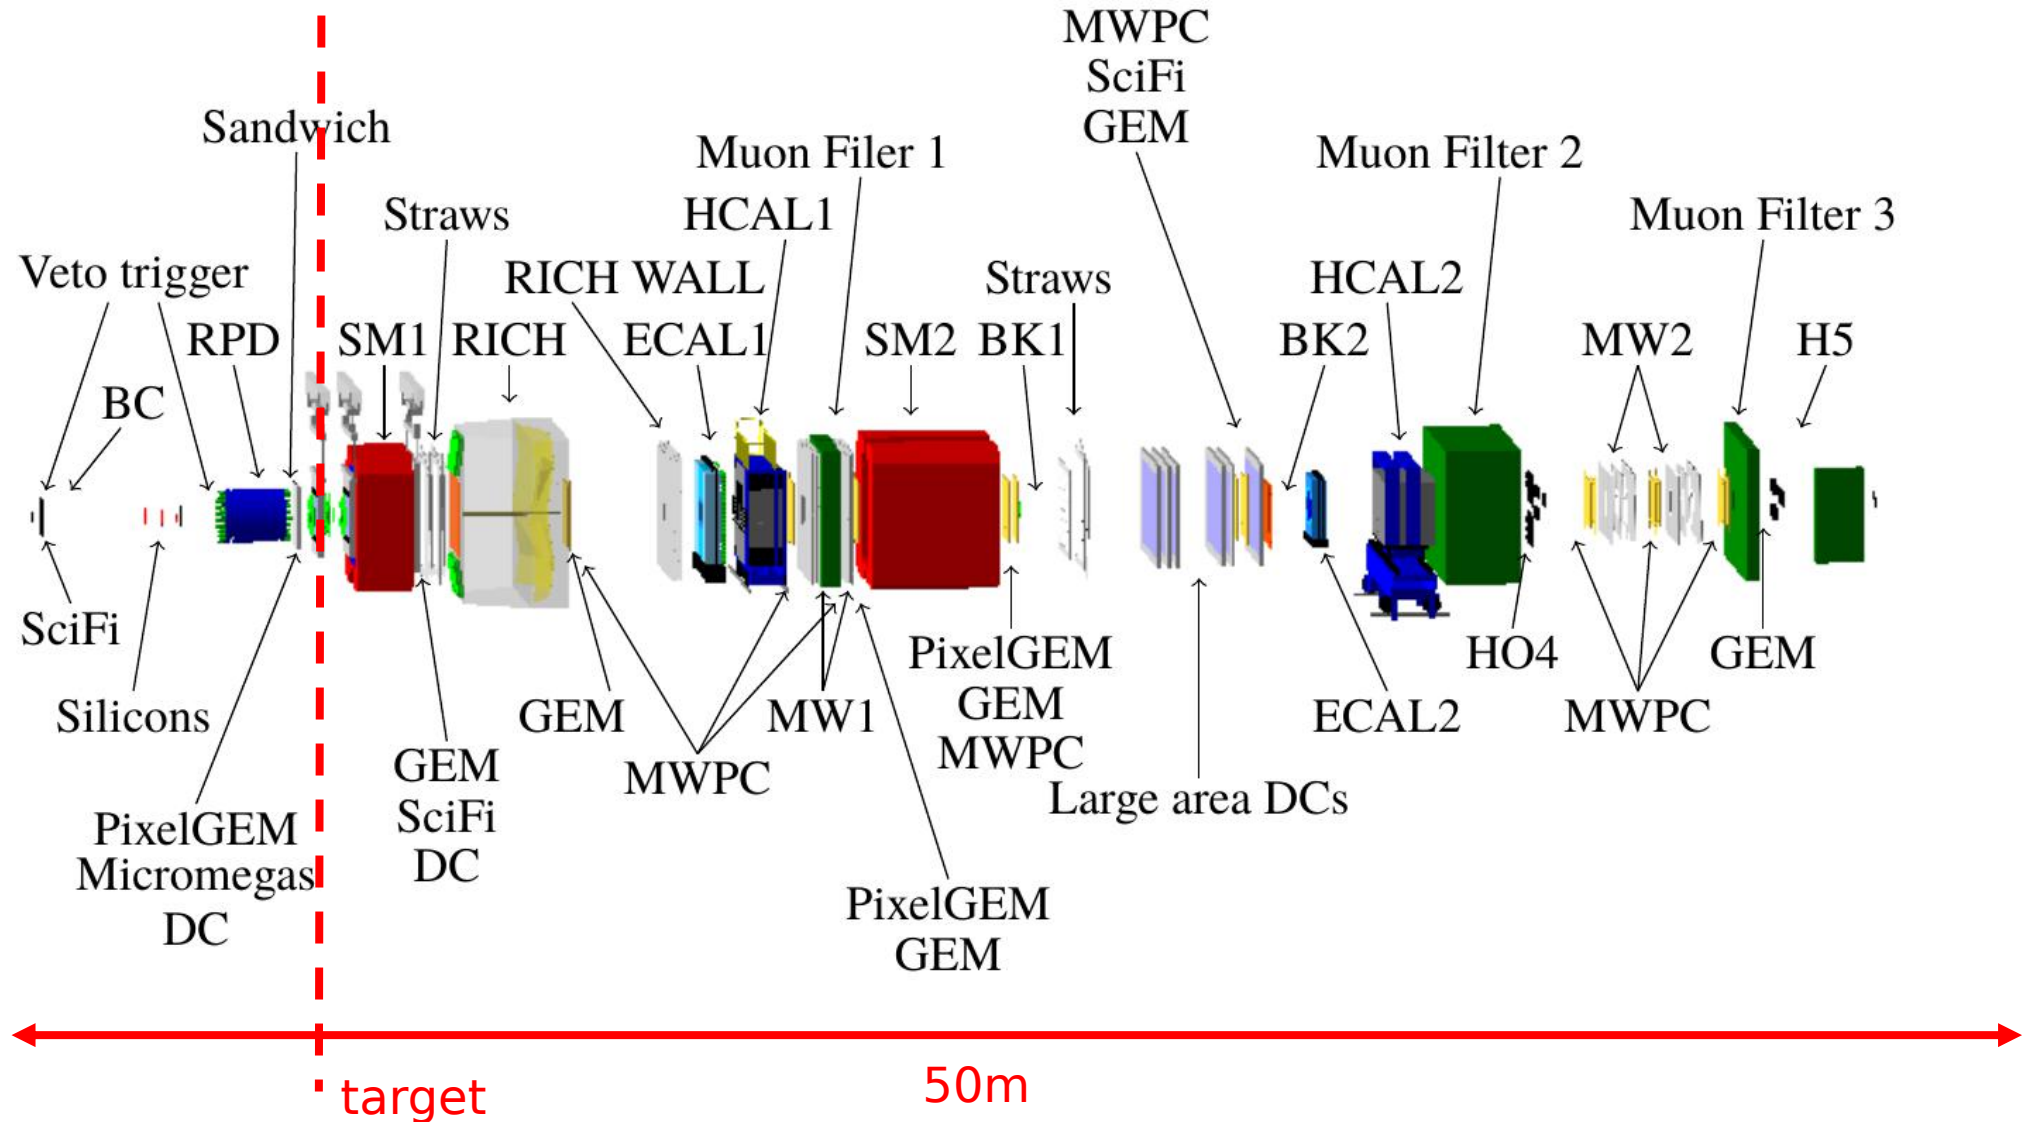

The starting point position of the particles

Layout of COMPASS detectors

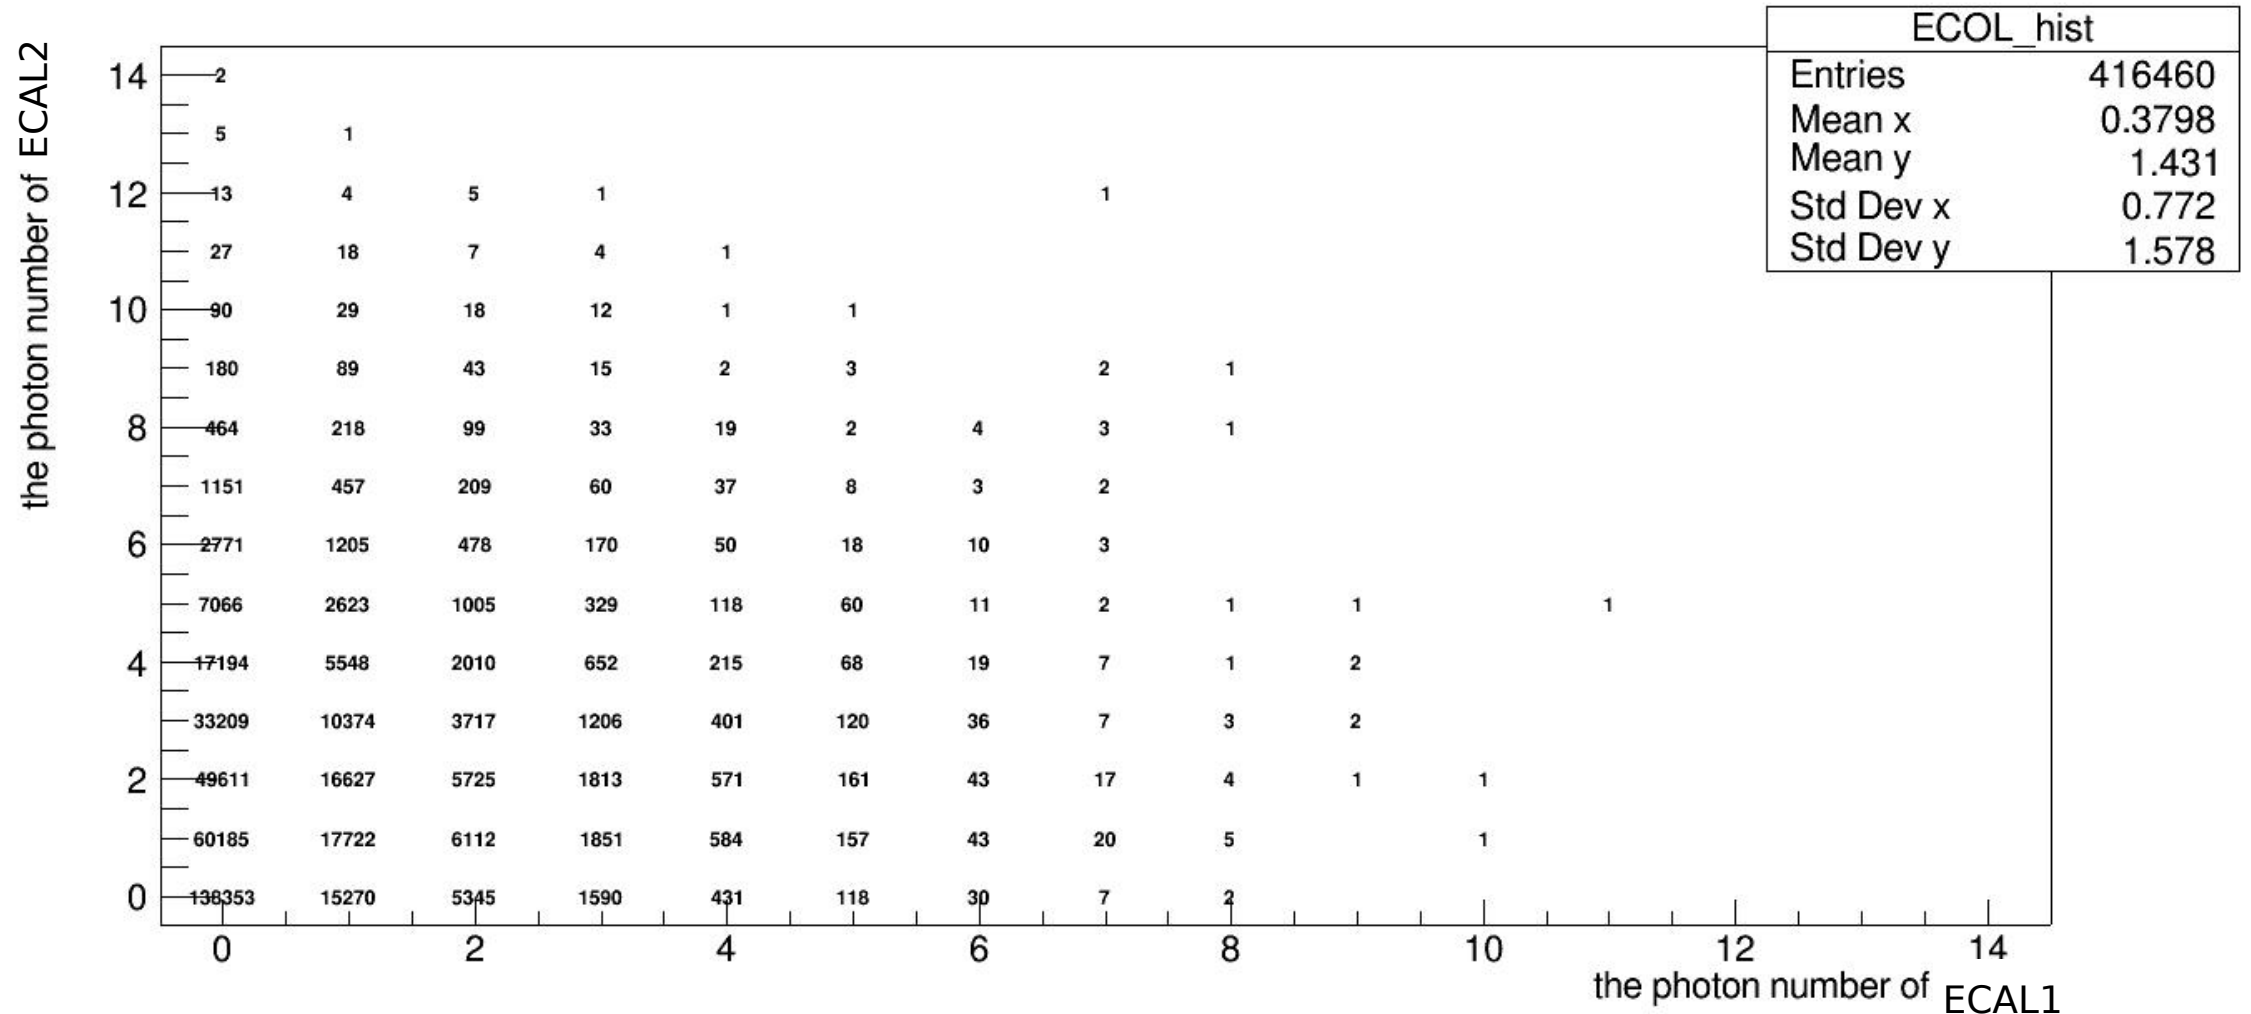

8/12

Investigation of photons from different ECALs

Event countings with number of photons from ECALs

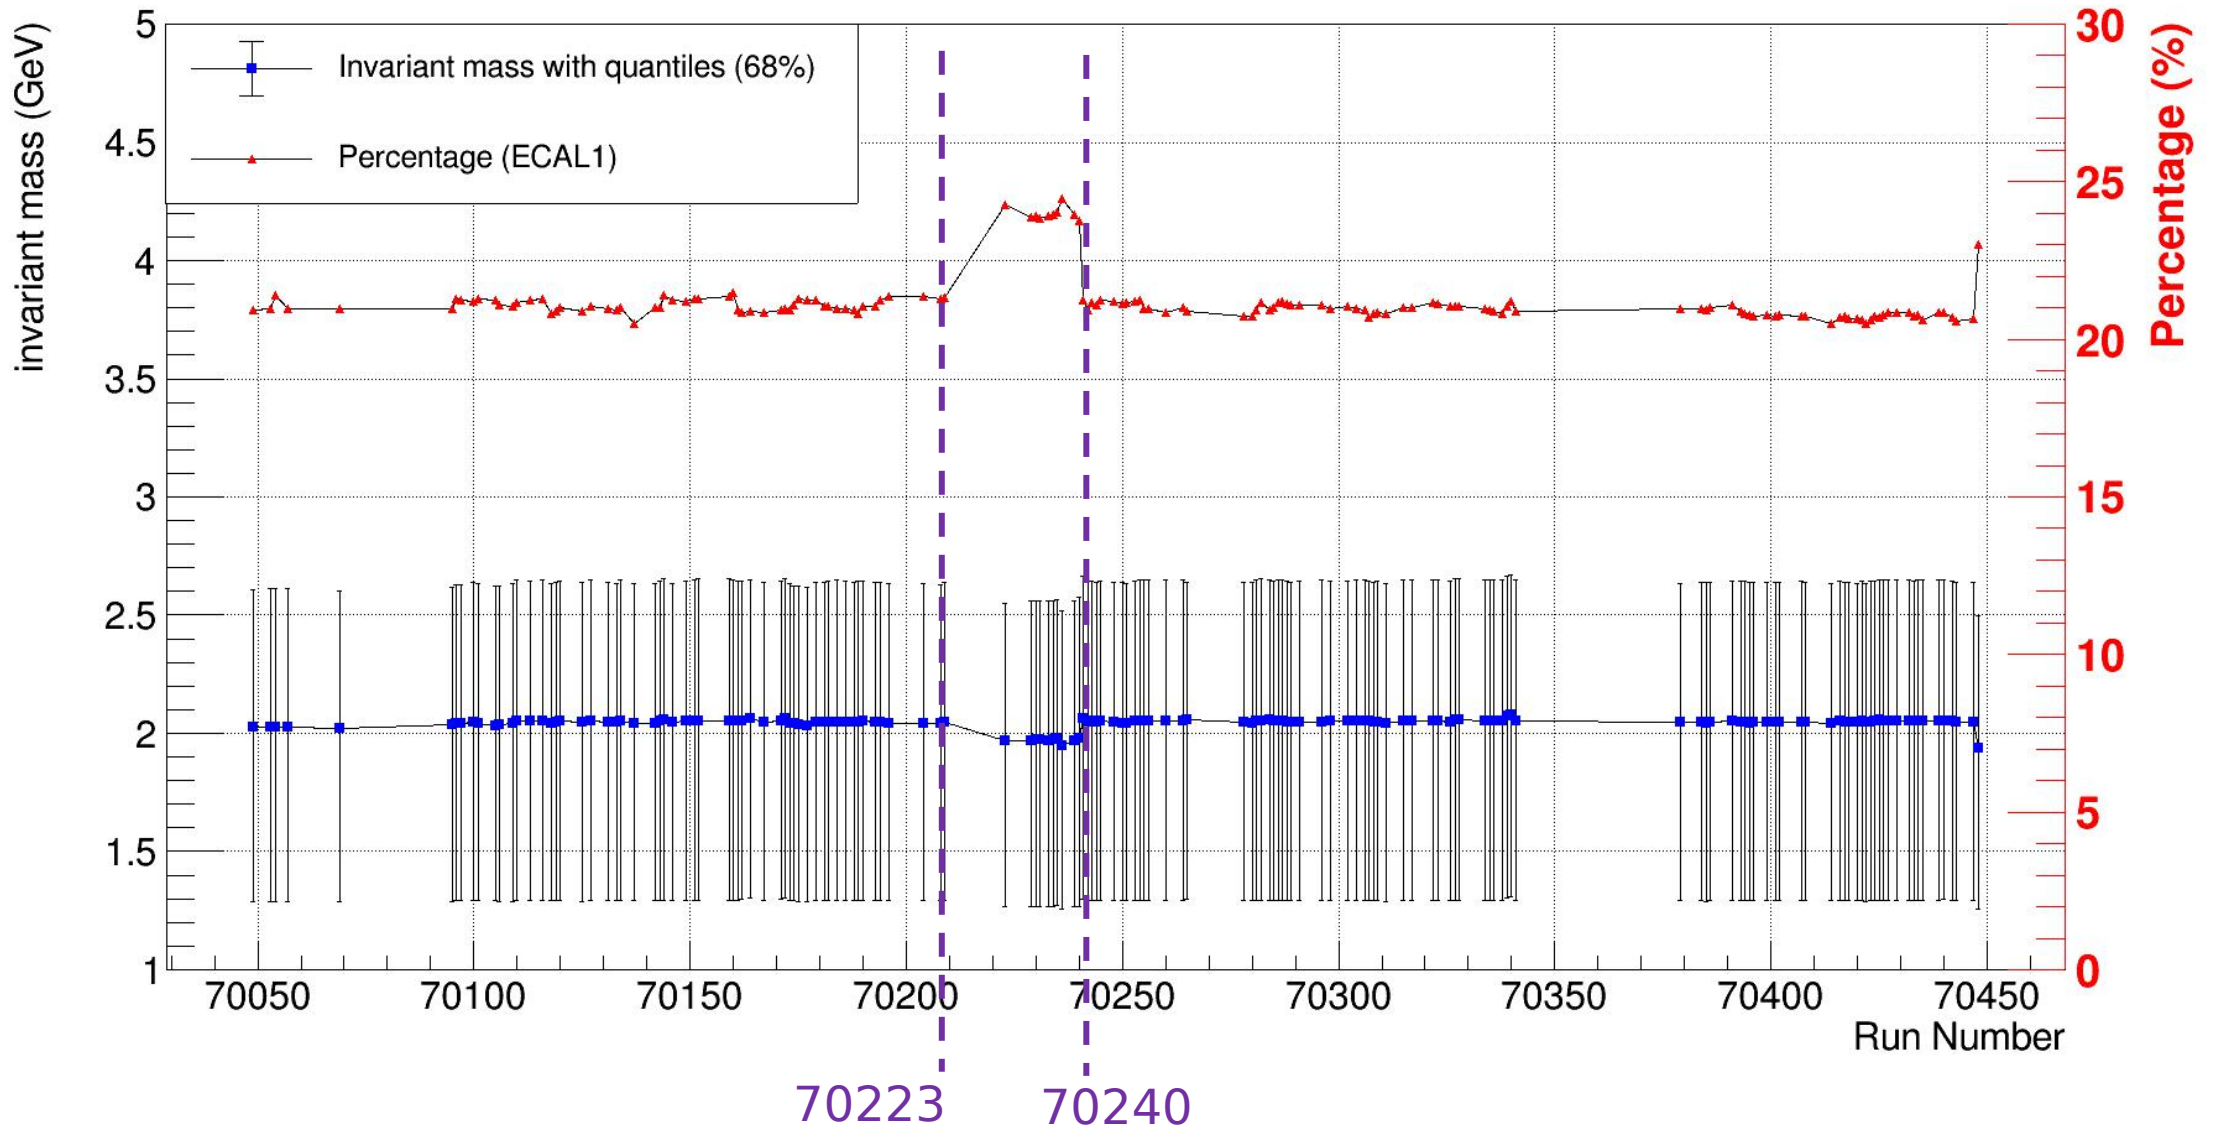

10/12

ECAL1 Photon percentage v. s. invariant mass

11/12

invariance mass and ECAL1 percentage

End
